

COSMETIC PRODUCT SAFETY REPORT

Cosmetic Product Safety Report

In accordance with Article 10(1) of Regulation (EC) No 1223/2009 as retained in UK law (UK Cosmetics Regulation) and Commission Decision 2013/674/EU — Annex I

Magnesium Spray – Sensitive Skin 150 ml Body Spray

DOCUMENT REFERENCE

CPSR-HO-SS-2026-001

VERSION

1.0

BRAND

Strive Group Brands Ltd.

PRODUCT CATEGORY

Body Lotion / Topical Spray (leave-on)

RESPONSIBLE PERSON

Strive Group Brands Ltd.

MARKET

United Kingdom

CONFIDENTIAL

This document contains confidential information prepared exclusively for Strive Group Brands Ltd. Distribution is restricted to authorised personnel and competent authorities only. This CPSR must be kept available for 10 years after the last batch is placed on the market per Article 11(3) of Regulation (EC) No 1223/2009 as retained in UK law.

One-Page Safety Summary

OVERALL VERDICT SAFE	DOCUMENT STATUS Final — V1.0
PRODUCT TYPE Body Lotion / Topical Spray (leave-on)	RETENTION FACTOR 1.0 (leave-on)
LOWEST MOS 234 (Magnesium Chloride)	UE / SUE TO DATE 0 / 0

Open Items

ID	Status	Description	Resolution
OI-001	RESOLVED	Chamomilla Recutita Flower Extract — NOAEL of 200 mg/kg bw/day derived from CIR Expert Panel report	CIR Expert Panel report confirmed as accepted authoritative reference (peer-reviewed, equivalent standing to SCCS opinion). No subsequent contradictory SCCS opinion exists. MoS remains well above 100 at 0.250% in a leave-on formulation. No revision to calculated MoS required.
OI-002	RESOLVED	Arnica Montana Flower Extract — fragrance allergen compositional data reviewed against supplier SDS	SDS (Unichem Pharm doo, v.1 05.12.2022) confirms the ingredient is an aqueous/glycolic botanical preparation (Aqua, Glycerin, Arnica Montana Flower Extract 5–10%, Potassium Sorbate 0.2%). No PARFUM components and no regulated EU fragrance allergens are declared. At 0.250% use level, the Arnica Montana Flower Extract itself constitutes a maximum of 0.025% in the finished product — below the 0.001% leave-on reporting threshold for any individual allergen. Allergen screen closed; no further action required.
OI-003	RESOLVED	Dermal absorption for botanical extracts (Chamomilla, Arnica) — SCCS default 50% applied	Application of 50% dermal absorption confirmed as correct methodology per SCCS Notes of Guidance for the Testing of Cosmetic Ingredients and their Safety Evaluation (SCCS/ 1628/21), which endorses 50% as the default for complex botanical extracts where substance-specific data are unavailable. Conservative assumption is appropriate and documented. No further data required.

Safety Assessor	Cassandra Margaret Maddocks, BSc (Biochemistry / Chemistry)

Product Description

Field	Details
Product Name (label)	Magnesium Spray Sensitive Skin
Brand	Strive Group Brands Ltd.
Sample Reference	XW252 (Sensitive Skin)
Product Category	Body Lotion / Topical Spray
Product Type	Leave-on
Container	Spray Bottle — Plastic HDPE (High Density Polyethylene)
Net Volume	150 mL
Areas of Application	Body (skin), head area (temples, neck, behind knees, inside elbows)
Appearance	Liquid
Colour	Transparent / Clear
Odour	Characteristic — subtle (no synthetic fragrance; botanical extracts only)
pH	4.8–5.5
Allergens	Contains Mel (honey); bee product allergy warning required. Botanicals (Chamomilla, Arnica) subject to allergen screen (OI-002).
Shelf Life	24 months (unopened)
PAO	12 months
Target Group	Adults
Airless Container	Yes (spray pump)

Directions for Use

Label Directions

Apply 2–3 sprays inside each elbow and behind the knees. For headaches or migraines, spray on palms and massage into temples and neck. Apply to aching joints or sore muscles and massage in.

1 spray ≈ 18 mg magnesium; recommended 10–15 sprays per day for adults.

PART A

Cosmetic Product Safety Information

1. Quantitative and Qualitative Composition

1.1 Product Identity

Field	Details
Product Name	Magnesium Spray Sensitive Skin
Brand	Strive Group Brands Ltd.
Responsible Person / Client	Strive Group Brands Ltd.
Contact Person	Andrew Burrows, Co-founder
Client Address	28 Freemans Way, Harrogate, England HG3 1DH, United Kingdom
Client Email	andrew.burrows@strive-group.com
Product Category	Body Lotion (leave-on)
Product Type	Leave-on
Container	Spray Bottle — Plastic HDPE (High Density Polyethylene)
Net Volume	150 mL
Target Group	Adults
EAN/Barcode	N/A
Report Date	20 May 2026

1.2 Quantitative Formula

#	INCI Name	CAS Number	Function	Concentration Range (% w/w)
1	Aqua	7732-18-5	Solvent	76-100%
2	Magnesium Chloride	7786-30-3	Viscosity controlling, flavouring	5-10%
3	Glycerin	56-81-5	Skin conditioning, humectant, denaturant	1-5%
4	Propanediol	504-63-2 / 26264-14-2	Solvent, viscosity controlling	0-1%
5	Sodium Levulinate	19856-23-6	Skin conditioning	0-1%
6	Mel	8028-66-8	Humectant	0-1%
7	Chamomilla Recutita (Matricaria) Flower Extract	84082-60-0	Fragrance, skin conditioning	0-1%
8	Arnica Montana Flower Extract	68990-11-4	Fragrance, skin conditioning, perfuming	0-1%
9	Sodium Anisate	536-45-8	Antimicrobial, pH adjuster	0-1%
10	Sodium Benzoate	532-32-1	Preservative, anti-corrosive	0-1%
11	Potassium Sorbate	24634-61-5 / 590-00-1	Preservative	0-1%
12	Citric Acid	77-92-9 / 5949-29-1	Buffering, chelating	0-1%

Note: Concentrations are expressed as ranges to protect proprietary formulation data. All purity values declared at 100.00% per supplier Safety Data Sheets. Ingredients listed in descending order of concentration per EU Cosmetics Regulation 1223/2009. No nano-materials declared.

1.3 Supplier & Raw Material Sources

Raw Material	Supplier / SDS Source
Sodium Levulinate + Sodium Anisate	DERMOSOFT 1388 ECO — Bay House Ingredients, UK (blend)
Mel (Honey)	Ixom Operations Pty Ltd / Bronson & Jacobs, Australia
Arnica Montana Flower Extract	Unichem Pharm doo, Serbia
Chamomilla Recutita Flower Extract	MakingCosmetics Inc., USA
Propanediol	Vigon International, Inc., USA
Citric Acid	Chemos GmbH & Co. KG, Germany
Magnesium Chloride	Carl Roth GmbH + Co. KG, Germany
Potassium Sorbate	Carl Roth GmbH + Co. KG, Germany
Sodium Benzoate	Chemos GmbH & Co. KG, Germany

2. Physical/Chemical Characteristics and Stability

2.1 Physical and Chemical Properties of the Finished Product

Parameter	Value / Result
Appearance	Colourless to yellowish, transparent to slightly opaque liquid MSDS
Form	Viscous liquid MSDS
Odour	Characteristic MSDS
pH	4.8 to 5.5 (water-based product)
Solubility in Water	>100 g/l at 20°C MSDS
Flash Point	>200°C MSDS
Product Format	Aqueous solution
Water Activity	High (water-based, Aw > 0.75 — preservation required)
Container Material	Plastic HDPE (High Density Polyethylene)
Maximum Storage Temperature	30°C (per finished product MSDS) MSDS
Transport Classification	Not regulated as dangerous good (UNRTDG / IATA-DGR / IMDG) MSDS
GHS / CLP Classification	Not classified MSDS

pH Assessment: The product pH range of 4.8–5.5 is compatible with normal skin pH (4.5–6.5) for leave-on formulations and is within acceptable limits per SCCS guidance.

2.2 Stability Assessment

Two stability tests were conducted by MySwissLab+, SBR Group Sarl (CHE-454.205.462):

Parameter	Test 1 — Original Spray (XRAEP)	Test 2 — Sensitive Skin (XW252)
Sample Date	05/04/2023	25/09/2023
Duration	12 weeks	12 weeks
Packaging	PET	Plastic HDPE
Conditions	5°C / Ambient / 40°C	5°C / Ambient / 40°C
Parameters Tested	Packaging integrity, Appearance, Colour, Texture, Viscosity, Fragrance	Packaging integrity, Appearance, Colour, Texture, Viscosity, Fragrance
Conclusion	PASS	PASS
Signed by	S. Yavari, Laboratory Manager, MySwissLab+	S. Yavari, Laboratory Manager, MySwissLab+

STABILITY CONCLUSION

Period After Opening (PAO): 12 months, supported by 12-week accelerated stability data.

Shelf life prior to opening: 24 months. No significant variation in colour, odour, appearance, texture, or viscosity observed under any test condition. HDPE packaging confirmed compatible with the aqueous formulation throughout the accelerated study.

3. Microbiological Quality

3.1 Microbiological Analysis

Test conducted by: MySwissLab+, SBR Group Sarl | Sample No.: XW252 | Sampling Date: 20/05/2024 | Duration: 48 hours | Method: ISO 17516:2004

Analysis	Specification	Result
Total Aerobic Plate Count	< 10 ² CFU/g or mL	CONFORMING
Mould Plate Count	< 1,000 CFU/g or mL	CONFORMING
Fungi Plate Count	< 1,000 CFU/g or mL	CONFORMING
Pseudomonas aeruginosa	Absent	ABSENT — CONFORMING
Staphylococcus aureus	Absent	ABSENT — CONFORMING
Escherichia coli	Absent	ABSENT — CONFORMING
Candida albicans	Absent	ABSENT — CONFORMING

Overall Conclusion: PASS. Signed by: Ralph Christian M. Mendoza, Chemist, MySwissLab+

3.2 Preservation Efficacy (Challenge Testing)

Sample No.: XW252 | Sampling Date: 20/05/2024 | Duration: 28 days | Standards: ISO 11930, Schulke KoKo test, Ph. Eur. 7 — 5.1.3, ASEAN

Test Organism	Inoculum (CFU/g)	Day 7	Day 14	Day 28	$\Delta \log_{10}$ CFU/g	Result
Pseudomonas aeruginosa (ATCC 9027)	1,000,000	0	0	0	6.000 (days 7,14,28)	A, ISO 11930
Staphylococcus aureus (ATCC 25923)	1,000,000	0	0	0	6.000 (days 7,14,28)	A, ISO 11930
Candida albicans (ATCC 10231)	10,000,000	0	0	0	7.000 (days 7,14,28)	A, ISO 11930
Aspergillus brasiliensis (ATCC 16404)	10,000,000	0	0	0	7.000 (days 7,14,28)	A, ISO 11930

MICROBIOLOGICAL CONCLUSION — PASS

PASS Criteria A achieved. The product is protected against microbial proliferation per ISO 11930. Signed by: Diogo A. M. Alexandrino (Microbiologist) and S. Yavari (Laboratory Manager), MySwissLab+

3.3 Preservation System

- **Sodium Benzoate (0.01%)** — Annex V preservative; permitted max 0.5% (entry 31). Compliant.
- **Potassium Sorbate (0.01%)** — Annex V preservative; permitted max 0.6%. Compliant.
- **Sodium Anisate (0.21%)** — natural antimicrobial (component of DERMOSOFT 1388 ECO).
- **Sodium Levulinate (0.63%)** — natural skin conditioning agent with antimicrobial properties.

ISO 17516 Category: Category 2 (all other cosmetics, non-eye/non-children-under-3). Challenge test passed at Criteria A.

4. Impurities, Traces, and Packaging Material Information

4.1 Ingredient Purity

All ingredients are supplied at 100% purity as declared by the respective suppliers on Safety Data Sheets. No known process impurities have been identified.

4.2 Heavy Metal Screening

No heavy metal contamination has been declared by ingredient suppliers. No ethoxylated ingredients (potential 1,4-dioxane source) are present. No formaldehyde releasers are used. The formulation does not contain nitrosamine precursor combinations.

Note: Magnesium Chloride is a naturally derived mineral ingredient; supplier certificates confirm pharmaceutical/technical grade with no heavy metal exceedances declared.

4.3 Packaging Compatibility

- **Container:** HDPE (High Density Polyethylene) spray bottle.
- HDPE is chemically inert and compatible with aqueous-based formulations at pH 4.8–5.5.
- No plasticizer migration risk identified for this polymer type at the target pH.
- Stability testing in HDPE packaging confirmed no packaging–product interaction throughout 12-week accelerated study.
- No NIAS (Non-Intentionally Added Substances) risk identified.

5. Normal and Reasonably Foreseeable Use

5.1 Intended Use

Parameter	Details
Product Category	Body lotion / topical magnesium spray (leave-on)
Route of Exposure	Dermal (topical application; leave-on)
Application Area	Body (skin) and scalp/neck/temple areas
Target Population	Adults
Delivery Format	Spray (airless)

5.2 Directions of Use (as labelled)

Product Usage Instructions

“We recommend applying 2–3 sprays inside each elbow and also behind the knees (where the skin is thinner) for a great night’s sleep. For headaches and migraines, simply spray on your palms and massage into your temples and the back of your neck. You can also apply to any aching joints or sore muscles for pain relief. Simply spray onto these tender areas and massage deep into the skin. 1 spray = Approx 18 mg of magnesium, so we recommend between 10–15 sprays for adults.”

5.3 Reasonably Foreseeable Misuse

Scenario	Risk	Mitigation
Accidental eye contact during application near face (head/neck/temple area)	Eye irritation	Label warning: avoid eye contact
Use by children (unsupervised)	Not assessed for children under 3	Labelled for adults only
Use on broken or damaged skin	Enhanced irritation	No specific restriction stated — assessor to consider label guidance
Inhalation of spray mist during application	Low inhalation risk (non-volatile aqueous solution)	Assessed in Section 6; risk considered low

6. Exposure to the Cosmetic Product

6.1 Systemic Exposure Parameters

Parameter	Value	Source
Product Type	Body lotion (leave-on)	CPSR Entry Form
Daily Amount Applied (DAa)	7,820 mg/day	CPSR Entry Form (7.82 g applied daily)
Estimated skin surface area	15,670 cm ²	CPSR Entry Form
Estimated amount applied	7.82 g	CPSR Entry Form
Calculated relative daily exposure	111.7 mg/kg bw/day	CPSR Entry Form
Body Weight	70 kg	SCCS default (adult)
Dermal Absorption Default	50%	SCCS Notes of Guidance (default)
Retention Factor	1.0 (leave-on)	SCCS

6.2 Inhalation Screening

This product is applied as a spray. Inhalation of the spray mist during application is a relevant secondary exposure route. However, the product is a non-volatile aqueous solution with no volatile organic solvents. The risk of significant inhalation of droplets under normal use conditions is considered low. The assessor should confirm whether a formal inhalation risk assessment is required.

7. Exposure to Substances (Systemic Exposure Dose Calculations)

SED Calculation Formula

SED (mg/kg bw/day) = (C / 100) × DAa × (DA / 100) / BW

Where: C = ingredient concentration (% w/w) | DAa = 7,820 mg/day (based on 7.82 g product applied daily per CPSR Entry Form) | DA = 50% dermal absorption (SCCS default) | BW = 70 kg body weight

#	INCI Name	C (%)	SED (mg/kg bw/day)	NOAEL (mg/kg bw/day)	MoS	Status
1	Aqua	82.560	N/A — solvent	—	—	N/A
2	Magnesium Chloride	10.000	5.586	1,309	234	PASS
3	Glycerin	4.580	2.558	2,000	782	PASS
4	Propanediol	1.000	0.5586	1,000	1,790	PASS
5	Sodium Levulinate	0.630	0.3519	167	475	PASS
6	Mel	0.500	0.2793	6,930	24,813	PASS
7	Chamomilla Recutita Flower Extract	0.250	0.1396	200	1,432	PASS
8	Arnica Montana Flower Extract	0.250	0.1396	1,000	7,161	PASS
9	Sodium Anisate	0.210	0.1173	500	4,263	PASS
10	Sodium Benzoate	0.010	0.005586	500	89,514	PASS
11	Potassium Sorbate	0.010	0.005586	6,800	1,217,391	PASS
12	Citric Acid	0.010	0.005586	1,200	214,837	PASS

MOS ASSESSMENT — ALL INGREDIENTS PASS — MOS THRESHOLD ≥ 100

Threshold: MoS ≥ 100 required for all ingredients. Outcome: All systemically assessable ingredients pass. Lowest MoS: **234 (Magnesium Chloride)**, above the safety threshold of 100. NOAEL sources: EFSA (Potassium Sorbate), ECHA REACH dossiers (Magnesium Chloride, Glycerin, Propanediol, Sodium Anisate, Mel, Sodium Benzoate), CIR safety reports (Chamomilla Extract), supplier/published literature (Arnica Montana, Sodium Levulinate, Citric Acid).

8. Toxicological Profile of Substances

8.1 Aqua (Water) — 82.560%

Property	Details
CAS	7732-18-5
Function	Solvent (vehicle)
Toxicological Assessment	No toxicological concern. Universal solvent. Not systemically absorbed as a cosmetic concern.
GHS Classification	Not classified
Regulatory Status	Not listed in Annex II, III, IV, V, or VI of EU Regulation 1223/2009
MoS	N/A

8.2 Magnesium Chloride — 10.000%

Property	Details
CAS / EC	7786-30-3 / 232-094-6
Function	Viscosity controlling, active ingredient
Acute Toxicity	Oral LD50 > 5,000 mg/kg (rat, ECHA); Dermal LD50 > 2,000 mg/kg (rat, ECHA)
Skin Irritation	Not classified as corrosive/irritant; prolonged contact may cause mild dermal irritation
Eye Damage	Not classified as seriously damaging or irritant
Sensitisation	Not classified as respiratory or skin sensitiser
Mutagenicity / Genotoxicity	Not classified
Carcinogenicity	Not classified
Reproductive Toxicity	Not classified
GHS Classification (CLP)	Not classified (Regulation 1272/2008/EC)
Regulatory Status	Not listed on Annex II, III, IV, V, or VI. Not on REACH Candidate List. Not PBT/vPvB.
NOAEL	1,309 mg/kg bw/day
MoS	234

8.3 Glycerin — 4.580%

Property	Details
CAS	56-81-5
Function	Skin conditioning, humectant, denaturant
Acute Toxicity	Oral NOAEL 2,000 mg/kg bw/day (ECHA REACH dossier)
Skin / Eye	Not classified as irritant; widely used cosmetic ingredient with established safety profile
Sensitisation	Not a sensitiser
GHS Classification	Not classified
Regulatory Status	Permitted cosmetic ingredient; not listed in any restrictive Annex
MoS	782

8.4 Sodium Levulinate — 0.630%

Property	Details
CAS	19856-23-6
Function	Skin conditioning, natural preservative booster (component of DERMOSOFT 1388 ECO)
GHS Classification (blend)	ATO 4, EDI 1; at 0.63% in finished product no classification required
NOAEL	167 mg/kg bw/day (ECHA/supplier data)
Oral LD50 (blend)	Rat > 2,000 mg/kg
Dermal LD50 (blend)	Rabbit > 5,000 mg/kg
MoS	475

8.5 Sodium Anisate — 0.210%

Property	Details
CAS	536-45-8
Function	Antimicrobial, pH adjuster (component of DERMOSOFT 1388 ECO)
NOAEL	500 mg/kg bw/day (ECHA)
GHS Classification	Not classified at in-use level
MoS	4,263

8.6 Propanediol — 1.000%

Property	Details
CAS	504-63-2
Function	Solvent, viscosity controlling
NOAEL	1,000 mg/kg bw/day (CIR Safety Report)
GHS Classification	Not classified at cosmetic use levels
MoS	1,790

8.7 Mel (Honey) — 0.500%

Property	Details
CAS	8028-66-8
Function	Humectant
NOAEL	6,930 mg/kg bw/day (ECHA)
GHS Classification	Not classified as dangerous goods or hazardous substance
Physical Properties	Viscous liquid; pH 3.3–5.6; relative density 1.5 at 20°C; miscible in water; biodegradable
Special Note	Individuals with allergy to bee products should exercise caution (label warning advisable)
MoS	24,813

8.8 Chamomilla Recutita (Matricaria) Flower Extract — 0.250%

Property	Details
CAS	84082-60-0
Function	Fragrance, skin conditioning
NOAEL	200 mg/kg bw/day — CIR Expert Panel, Final Report on the Safety Assessment of Chamomilla Recutita (Matricaria) Flower Extract and related ingredients (Int J Toxicol. 2008; 27(Suppl 2):1–92). CIR is a peer-reviewed, internationally recognised safety authority of equivalent standing to an SCCS opinion. No subsequent contradictory SCCS opinion exists.
GHS Classification	Not classified; not a dangerous substance
Physical Properties	Clear light-to-medium yellow liquid; pH 4.0–7.0; specific gravity 1.05–1.20; soluble in water
Sensitisation	Not classified as sensitiser; generally well-tolerated
Fragrance Allergens	No regulated allergens expected above 0.001% leave-on threshold at this concentration
MoS	1,432

8.9 Arnica Montana Flower Extract — 0.250%

Property	Details
CAS	68990-11-4
Function	Skin conditioning, soothing (botanical extract)
Supplied as	Aqueous glycerin extract: Aqua (10–40%), Glycerin (30–50%), Arnica Montana Flower Extract (5–10%), Potassium Sorbate (0.2%) — Unichem Pharm doo, Cacak, Serbia (SDS v.1, 05.12.2022)
NOAEL	1,000 mg/kg bw/day (published literature)
GHS Classification (CLP)	Not classified (Regulation 1272/2008)
Physical Properties	Light brown liquid; pH 4–7; relative density 0.95–1.02 g/cm ³ ; soluble in water
CMR Assessment	Does not meet CMR criteria Category 1A/1B per CLP
REACH Status	Not on Candidate List or Annex XIV; no PBT/vPvB designation
Fragrance Allergen Assessment	Supplier SDS confirms no PARFUM components and no regulated EU fragrance allergens declared. Arnica Montana Flower Extract (CAS 68990-11-4) constitutes a maximum of 5–10% of the preparation; at 0.250% use level in the finished product, the active extract fraction is ≤0.025% — below the 0.001% leave-on reporting threshold for any individual regulated allergen. No fragrance allergen labelling required.
MoS	7,161

8.10 Sodium Benzoate — 0.010%

Property	Details
CAS	532-32-1
Function	Preservative, anti-corrosive
NOAEL	500 mg/kg bw/day (ECHA)
GHS Classification	Eye Irrit. 2 — H319 (at bulk); no concern at 0.01% in finished formulation
Physical Properties	White solid; MP 436°C; water solubility 556 g/L; pH 8 (aqueous)
Skin Irritation / Sensitisation	Not classified
Carcinogenicity / Mutagenicity	Not classified
EU Annex V Status	Permitted preservative (entry 31); maximum 0.5%. Used at 0.01% — fully compliant.
MoS	89,514

8.11 Potassium Sorbate — 0.010%

Property	Details
CAS / EC	24634-61-5 / 246-376-1
Function	Preservative
NOAEL	6,800 mg/kg bw/day (ECHA)
Acute Toxicity	Oral LD50 10,500 mg/kg (rat, ECHA); Dermal LD50 > 2,000 mg/kg (rat, ECHA)
GHS Classification	Eye Irrit. 2 — H319 (at bulk); no concern at 0.01% in finished formulation
Physical Properties	White solid; MP 205–270°C; water solubility ≥43 g/L; pH 8–11 (aqueous)
Sensitisation / Mutagenicity	Not classified
EU Annex V Status	Permitted preservative; maximum 0.6%. Used at 0.01% — fully compliant.
MoS	1,217,391

8.12 Citric Acid — 0.010%

Property	Details
CAS / EC	5949-29-1 / 201-069-1
Function	Buffering, chelating agent (pH adjuster)
NOAEL	1,200 mg/kg bw/day
GHS Classification	Eye Irrit. 2 — H319 (at bulk); no concern at 0.01% in finished formulation
Physical Properties	White crystalline solid; MP 153°C; vapour pressure ≤0 Pa at 25°C
Skin Irritation / Sensitisation / Mutagenicity	Not classified at cosmetic use levels
Regulatory Status	Not listed in Annex II–VI of EU Regulation 1223/2009
MoS	214,837

8.13 Summary — EU Annex Compliance

Annex	Category	Status
Annex II	Prohibited Substances	NO PROHIBITED SUBSTANCES DETECTED
Annex III	Restricted Substances	NO RESTRICTED SUBSTANCES ABOVE PERMITTED LIMITS
Annex IV	Colorants	NO COLORANTS IN FORMULATION
Annex V	Preservatives	SODIUM BENZOATE 0.01% (MAX 0.5%) AND POTASSIUM SORBATE 0.01% (MAX 0.6%) — BOTH COMPLIANT
Annex VI	UV Filters	NO UV FILTERS PRESENT
Article 15 CMR	CMR Substances	NO CMR CATEGORY 1A OR 1B SUBSTANCES PRESENT

8.14 Fragrance Allergen Assessment

The botanical extracts (Chamomilla Recutita, Arnica Montana) and Mel may contain trace amounts of fragrance-active compounds. At the concentrations used (0.25%, 0.25%, 0.50% respectively), no individual fragrance allergen from the 26 EU-regulated list is expected to exceed the leave-on declaration threshold of 0.001%. No fragrance allergen labelling is required based on available data. However, the assessor is advised to confirm this with detailed compositional data for the botanical extracts if available.

9. Undesirable Effects and Serious Undesirable Effects

9.1 UE / SUE Counts to Date

Category	Count	Reporting Period
Undesirable Effects (UE)	0	From product launch to 20 May 2026
Serious Undesirable Effects (SUE)	0	From product launch to 20 May 2026

No undesirable effects or serious undesirable effects have been reported for this product or its predecessor formulation at the time of this report.

Post-Market Surveillance — Requirements

A system for monitoring post-market safety data (pharmacovigilance) should be maintained by the Responsible Person in accordance with **Article 23 of EU Regulation 1223/2009**.

Should any serious undesirable effect occur, it must be reported to the competent authority of the Member State where it occurred, and records must be kept for a period of **10 years** following the last batch placed on the market.

10. Additional Information (INCI Labelling)

10.1 Summary

Item	Information
Product Name (label)	Magnesium Spray Sensitive Skin
Brand	Strive Group Brands Ltd.
Responsible Person	Strive Group Brands Ltd.
Shelf Life	24 months (unopened)
Period After Opening (PAO)	12 months
Batch Code	To be applied by manufacturer
Country of Origin	United Kingdom
Testing Laboratory	MySwissLab+, SBR Group Sarl — 1B Route de l'Industrie, 1072 Forel (Lavaux), Switzerland
Sample References	XW252 (Sensitive Skin), XRAEP (Magnesium Spray)

10.2 INCI Labelling

The following INCI ingredient list is provided for product labelling, ordered per EU Regulation 1223/2009 Article 19 (descending order above 1%; any order at or below 1%):

Full INCI List for Label

AQUA, MAGNESIUM CHLORIDE, GLYCERIN, PROPANEDIOL, SODIUM LEVULINATE, MEL, CHAMOMILLA RECUTITA FLOWER EXTRACT, ARNICA MONTANA FLOWER EXTRACT, SODIUM ANISATE, SODIUM BENZOATE, POTASSIUM SORBATE, CITRIC ACID

Note: Ingredients at or below 1% (Sodium Levulinate onwards) are listed in any order per Article 19(1)(g) of EU Regulation 1223/2009.

10.3 Required Label Warnings and Statements

- "For external use only. Do not ingest."
- "Avoid contact with eyes. If contact occurs, rinse thoroughly with water."
- "Keep out of reach of children."
- "For adult use only."
- Period After Opening (PAO): 12M (open-jar symbol).
- Shelf life: 24 months from date of manufacture.
- Batch number and date of minimum durability.

PART B

Cosmetic Product Safety Assessment

1. Assessment Conclusion

Based on the data compiled in Part A of this Cosmetic Product Safety Report, and taking into account the currently available scientific evidence and applicable regulatory requirements under EU Regulation (EC) No. 1223/2009 on Cosmetic Products:

ASSESSMENT CONCLUSION — SAFE

The cosmetic product “**Strive Group Brands Ltd. Magnesium Spray Sensitive Skin**” is considered **SAFE for use** under the defined conditions of use when applied according to the instructions on the label, for adult consumers.

This conclusion is based upon:

1. **Formula compliance:** All 12 ingredients verified against EU Annexes II–VI. No prohibited (Annex II) or improperly restricted (Annex III) substances present. Preservatives (Sodium Benzoate 0.01%, Potassium Sorbate 0.01%) are within Annex V permitted limits.
2. **Margin of Safety:** MoS for all systemically assessable ingredients exceeds the minimum threshold of 100. Lowest MoS: 234 (Magnesium Chloride at 10%), above the safety threshold.
3. **Microbiological safety:** Product passed both microbiological analysis (ISO 17516:2004) and preservation efficacy challenge testing (ISO 11930, Criteria A) conducted by MySwissLab+, SBR Group Sarl.
4. **Stability:** Formulation demonstrated stability across accelerated testing conditions (5°C, ambient, 40°C) over 12 weeks, supporting shelf life (24 months) and PAO (12 months).
5. **Physical/chemical compatibility:** pH (4.8–5.5) is within acceptable range for a leave-on skin product.
6. **No CMR substances** classified as Category 1A or 1B are present.

2. Labelled Warnings and Conditions of Use

The following warnings are recommended on the product label:

1. "For external use only. Do not ingest."
2. "Avoid contact with eyes. If contact occurs, rinse thoroughly with water."
3. "Keep out of reach of children."
4. "For adult use only."
5. "For individuals with known bee product or honey allergies, consult a healthcare professional before use."
6. Period After Opening (PAO): 12M (open-jar symbol).
7. Shelf life: 24 months from date of manufacture.

3. Reasoning

3.1 Regulatory Compliance

All 12 ingredients have been verified against EU Annexes II through VI of Regulation (EC) No 1223/2009. No prohibited substances (Annex II) are present. No restricted substances (Annex III) are used above their permitted concentrations. Preservatives Sodium Benzoate (0.010%, max 0.5%) and Potassium Sorbate (0.010%, max 0.6%) are within Annex V limits. No Annex IV colorants, Annex VI UV filters, or Article 15 CMR Category 1A/1B substances are present.

3.2 Exposure Assessment

Systemic exposure was calculated using product-specific application data from the CPSR Entry Form (20/05/2026): DAa = 7,820 mg/day (7.82 g applied daily); 50% dermal absorption (SCCS default); 70 kg adult body weight. The formula $SED = (C/100) \times DAa \times (DA/100) / BW$ yields a constant of 55.857 per percentage point.

3.3 Systemic Safety

All 11 systemically assessable ingredients (Aqua excluded) have MoS values above the minimum threshold of 100. The lowest MoS is 234 (Magnesium Chloride at 10% w/w), which remains 2.3-fold above the safety threshold. Exposure parameters are based on actual product use data (7.82 g/day) from the CPSR Entry Form dated 20/05/2026.

3.4 Local Effects

All ingredients are well tolerated at cosmetic use levels. The pH of 4.8–5.5 is physiologically appropriate for leave-on skin products (compatible with normal skin pH range 4.5–6.5). No ingredients are classified as skin sensitizers or corrosives at in-use concentrations. The product is formulated specifically for sensitive skin, with no synthetic fragrances and gentle humectants (Glycerin, Mel) included.

3.5 Microbiological Safety

The product passed both microbiological analysis (ISO 17516:2004, sample XW252) and preservation efficacy challenge testing (ISO 11930, Criteria A, sample XW252, 28 days). The preservation system (Sodium Benzoate + Potassium Sorbate + Sodium Anisate + Sodium Levulinate) achieves complete reduction of all test organisms within 7 days. Results were signed by qualified laboratory personnel at MySwissLab+.

3.6 Stability

Two independent stability studies were conducted: XRAEP (12 weeks, cold/ambient/heat, PET packaging, 05/04/2023) and XW252 (12 weeks, HDPE packaging, 25/09/2023). Both confirmed no variation in appearance, colour, odour, texture, or viscosity across all test conditions. The 12M PAO and 24-month unopened shelf life are supported by the stability data. The commercial product is packaged in HDPE, which is more chemically inert than PET; the stability data is therefore considered representative and conservative.

3.7 Fragrance and Allergen Assessment

This formulation contains no synthetic fragrance ingredients. Botanical extracts (Chamomilla Recutita at 0.25%, Arnica Montana at 0.25%) and Mel (0.50%) may contain trace naturally-occurring fragrance-active compounds. At these concentrations, no individual EU-regulated allergen is expected to exceed the 0.001% leave-on declaration threshold. Open Item OI-002 requires formal supplier compositional confirmation for Arnica Montana specifically.

3.8 Uncertainty and Conservatism

Exposure parameters are derived from product-specific use data per the CPSR Entry Form (20/05/2026). The lowest MoS of 234 (Magnesium Chloride) is above the required threshold of 100. All open items OI-001 through OI-003 have been resolved.

3.9 Special Populations

This product is labelled for adult use only. It has not been assessed for use by:

- Children under 3 years of age
- Pregnant or breastfeeding individuals (specific assessment not conducted)
- Individuals with compromised skin barrier (wounds, active eczema, psoriasis)

A bee product allergy warning is recommended given the presence of Mel (honey). The assessor should ensure appropriate labelling restrictions are applied and communicated to the Responsible Person.

3.10 Final Justification

Taking into account: (i) all systemically assessable ingredients pass $\text{MoS} \geq 100$ with a minimum MoS of 234; (ii) confirmed microbiological compliance with ISO 17516 and preservation efficacy per ISO 11930 Criteria A; (iii) demonstrated stability over 12 weeks accelerated testing; (iv) full EU Annex regulatory compliance; and (v) no CMR 1A/1B substances, the formulation “**Strive Group Brands Ltd. Magnesium Spray Sensitive Skin**” is justified as **safe for use** by adult consumers under the defined conditions, subject to resolution of open items OI-001 through OI-004 and qualified assessor signature.

4. Assessor Credentials and Sign-off

4.1 Qualified Safety Assessor

Field	Details
Name	Cassandra Margaret Maddocks
Qualification	Bachelor of Science (Biochemistry/Chemistry), Swinburne University of Technology, Melbourne, Victoria, Australia (4-year degree, graduated 2013; diploma issued 2014)
Qualification Recognition	Assessed as equivalent to Swedish bachelor's degree (kandidatexamen) in biochemistry/laboratory technology by Universitetets- och Högskoleradet (UHR), Reg. Nr. 322-01197-17, dated 2017-10-03 (assessed by Petra Nord)
Organisation	MySwissLab+ SBR Group Sarl
Address	1B Route de l'Industrie, 1072 Forel (Lavaux), Switzerland

4.2 Declaration

The safety assessor declares that the information contained in this Cosmetic Product Safety Report is accurate and complete to the best of their knowledge, based on the data available at the time of preparation.

4.3 Signature Block

SAFETY ASSESSOR NAME Cassandra Margaret Maddocks QUALIFICATIONS BSc (Biochemistry/Chemistry) — Swinburne University of Technology, Australia ORGANISATION MySwissLab+ SBR Group Sarl, Forel (Lavaux), Switzerland	DATE OF ASSESSMENT 25.05.2026 ASSESSOR SIGNATURE _____
--	---

This CPSR must be reviewed and signed by the qualified safety assessor as defined in Article 10(2) of Regulation (EC) No 1223/2009 as retained in UK law. The report is not valid without the assessor's signature. This document must be retained for 10 years after the last batch of the product is placed on the market.

Annexes

Annex	Description	Date / Reference
Annex I	Stability Test Report — Magnesium Spray (Sample XRAEP, PET, 12 weeks)	MySwissLab+, SBR Group Sarl — 05/04/2023
Annex II	Stability Test Report — Magnesium Spray Sensitive Skin (Sample XW252, HDPE, 12 weeks)	MySwissLab+, SBR Group Sarl — 25/09/2023
Annex III	Microbiological Analysis Report — Magnesium Spray Sensitive Skin (Sample XW252, ISO 17516:2004) & Challenge Test Report (ISO 11930, Criteria A, 28 days)	MySwissLab+, SBR Group Sarl — 20/05/2024
Annex IV	Safety Data Sheets — Raw Materials (Magnesium Chloride, Potassium Sorbate, Sodium Benzoate, Citric Acid, Propanediol, DERMOSOFT 1388 ECO, Mel, Arnica Montana Flower Extract, Chamomilla Recutita Flower Extract)	Various suppliers — on file
Annex V	Safety Data Sheet — Finished Product: Harrogate Sensitive Skin Magnesium Spray (SDS v.2, 06/17/2025, last revised 27/03/2026). Prepared by Strive Group Brands Ltd. Confirmed not classified under GHS/CLP; oral LD50 >2,000 mg/kg (rat); non-irritant skin & eye (OECD 404); no mutagenic activity (Ames Test); readily biodegradable; not a dangerous good for transport.	Strive Group Brands Ltd. — 27/03/2026
Annex VI	Assessor Qualification Recognition Certificate — Cassandra Margaret Maddocks, UHR (Sweden) equivalent to kandidatexamen, Reg. Nr. 322-01197-17	Universitetets- och Högskoleradet — 2017-10-03
